

Yuutu?it?ath Government Planned Power Outage

Thursday, July 25

ʔuʔaʕʕasuu Citizens and Residents of hitaʕu,

There will be a **planned power outage** in hitaʕu on **Wednesday, July 31, 2024, from 10:00am to 3:00pm**, while BC Hydro preforms a pole replacement.

Core Yuutu?it?ath Government services are not expected to be interrupted; the Cixʷatin Centre will remain open during the power outage, running on generator power. All other Yuutu?it?ath Government buildings, including the huuʔatu Centre, are anticipated to be without power and will be closed until power resumes.

All hitaʕu residents are asked to prepare their household for the power outage.

Residents are encouraged to prepare for the power outage by:

- Turning off electric heaters or air conditioners, major appliances.
- Unplugging sensitive electronics.
- Pre-planning any nutritional needs you and your family require to see you through the day.

If you rely on electric medical equipment or access doors, please have a plan in place to maintain use. For the first hour following power being restored, only turn on or plug in electronic devices and appliances that are necessary. Reducing power usage after a power outage helps to reduce load on the system and gives time for it to stabilize.

Sincerely,

Yuutu?it?ath Government – Ucluelet First Nation
